

February 28 - March 6, 2003

<P>All five instruments aboard Terra are operating normally. The Flight Operations Team successfully completed a drag make-up maneuver on March 6. The team also conducted the first full simulation of the deep space calibration maneuver on March 5. This simulation involved all Terra instrument teams and was conducted by an independent simulations director.</P>

<P>TERRA PLANS:

Work continues in preparation for the first Deep Space Calibration Maneuver for Terra on March 26, 2003.

The next lunar calibration roll maneuver for MODIS will be conducted on March 22, 2003,

4 days prior to the first Deep Space Calibration Maneuver (without the moon) on March 26, 2003.
